## Our philosophy of free will feeding with a LICK BLOCK BAR

Animals have an instinct to cover their mineral requirements. They search for different sources of nutrients to absorb the amount of minerals and vitamins their bodies need.

Lick blocks and lick bowls serve this natural instinct very well. The animals are able to consume the licks at their own will (free will) and thus balance their individual needs.

The great advantage of a free will supply is that most deficiency symptoms and resulting diseases do not even occur. The animals remain vital and healthy and are more resistant to diseases.

With the help of a LICK BLOCK BAR the nutritional philosophy of "free will feeding" can be ideally implemented.

## The LICK BLOCK BAR

With a LICK BLOCK BAR the animal is offered a selection of different licks at the same time. The horse can ideally balance its individual needs for minerals, trace elements and vitamins at its own will.

Each of our lick blocks has been developed especially for horses and has a special recipe, always keeping in mind the horses' mineral requirements.

By offering different licks the animal can access its natural instinct and seek out different sources of nutrients.

A LICK BLOCK BAR is probably the highlight in every open stable, paddock or pasture!

# HerbaBlock

Mineral feed for horses, cattle, sheep, goats and deer

## Mineral lick with wild herbs for an intestinal environment hostile to worms

The HerbaBlock is enriched with a special herbal mixture and thus naturally strengthens the intestinal environment against worm infestation. In addition to salt and trace elements certain herbs are absorbed. Due to their high content of bitter and tannic substances the intestinal environment becomes unfriendly to worms.

Previously, horses could find lots of bitter herbs in nature and ate them specifically to protect themselves naturally against excessive worm infestation. Since today's meadows hardly offer a selection of bitter herbs, we have enriched our HerbaBlock with just these herbs. To have less often a reason for chemical anti-worming, the intestines of the animals should be strengthened and supported with appropriate herbs. HerbaBlock is doping-free according to the Anti-Doping and Medication Control Rules (ADMR) of the German Equestrian Federation (FN).

### Effects and benefits:

- Strengthens the intestine for a worm-unfriendly intestinal environment
- Supports a healthy diet with help of special herbs
- May help reduce the need for chemical worming treatments
- Supports metabolism and general well-being
- May help to prevent deficiency diseases

MADE IN EU

Erhältlich in:

3kg

5kg

10kg

### Analytical ingredients:

37,5% sodium (Na), 0,5% calcium (Ca), 0,35% magnesium (Mg)

### Composition:

sodium chloride, herb mix 1% (pumpkin seeds, walnut leaves, male fern herb, southernwood herb, coriander, wild garlic, dandelion herb), calcium carbonate, magnesium oxide, molasses 0,2%

### Additives / kg:

930mg iron (sulphate monohydrate (II)) (3b103), 273mg manganese (oxide) (3b502), 145mg zinc (oxide) (3b603), 60mg iodine (coated granulated calcium iodate anhydrous) (3b203), 25mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 7,5mg selenium (coated granulated sodium selenite) (3b802)

# ANTI - INSECT

Mineral feed for horses, cattle, sheep and goats

## Lick block with insect deterrent

ANTI-INSECT is a special, patented mineral lick with natural active ingredients to deter insects. The special formula can help to keep flies, mosquitoes, fleas and other harmful insects away. In addition, the animal is supplied with minerals, trace elements and vitamins according to their individual needs.

## Effects + benefits:

- Can deter insects, which are hazardous to health, like flies, mosquitoes, fleas
- Can support the blood circulation and prevent arterial thrombosis
- Supports the immune system and can prevent bacterial diseases
- Promotes the maintenance of a neutral pH of the stomach
- Antioxidant effect due to the minerals iron, selenium, zinc, manganese and Vitamin E
- Improves digestion and metabolism
- Can reduce the stress factor caused by pesky insects

Available in:

3kg

5kg

10kg

## Analytical ingredients:

37,5% sodium (Na), 0,79% calcium (Ca), 0,35% magnesium (Mg), 0,25% phosphorus (P)

## Composition:

sodium chloride, calcium carbonate, dicalcium phosphate, magnesium oxide, garlic based essential oils, molasses (0,3%)

## Nutritional Additives / kg:

930mg iron (sulphate monohydrate (III)) (3b103), 273mg manganese-II-oxide (3b502), 145mg zinc (oxide) (3b603), 60mg iodine (coated granulated calcium iodate anhydrous) (3b203), 25mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 7,5mg selenium (coated granulated sodium selenite) (3b802), 15.000 IU vitamin A (3a672a), 2.500 IU vitamin D3 (3a671), 21,3 IU vitamin E (3a700)

## Sensory additives:

natural flavourings

# PROBIOTIC

Mineral feed for horses, cattle and goats

## Lick block with live yeast from Levucell®

PROBIOTIC lick block improves the digestion and the immune system thanks to specific live yeast.

### Effects + benefits:

- Live yeast increases the fibre digestion, which leads to higher feed efficiency and higher milk production
- Lowers the risk of laminitis for horses
- Reduces the symptoms of metabolic acidosis, thus the level of milk production can be improved
- Strengthens the immune system
- Increases fertility
- Higher quality of the colostrum

### Benefits especially for horses:

#### Live yeast increases the fiber digestion

With the live yeasts in PROBIOTIC, a higher digestibility of the fibre structure of hay or straw is achieved. The digestion of hay requires a very high activity level of the digesting bacteria located in the colon. The cellulose-splitting microorganisms are stabilized by the added live yeast and thus an improved digestive activity can be reached. Especially horses with a tendency to fecal water, mostly when switching from pasture to hay and straw, can benefit from feed supplement with live yeast.

**SIN HELLAS**  
Salt Inclusive Nutriment

LEADERS IN ANIMAL NUTRITION

Available in:

3kg

5kg

10kg

**MADE  
IN EU**

## Live yeast has an immunogenic and anti-microbial effect on the horse

Living yeast cells in PROBIOTIC support a non-specific stimulation of the immune system. The special glycoprotein structure of the cell surface causes an immune response, which strengthens the immune system of the horse. The barrier function of the intestinal mucosa is supported by feeding live yeast. These yeasts can also bind bacterial toxins and prevent transmission of infectious agents to the intestinal of the horse and foster excretion.

### Analytical ingredients:

34,8 % sodium (Na), 1,45% calcium (Ca), 1,5% magnesium (Mg), 0,5% phosphorus (P)

### Composition:

sodium chloride, magnesium oxide, calcium carbonate, dicalcium phosphate, molasses (0,3%)

### Nutritional Additives / kg:

1.500mg iron (sulphate monohydrate (III)) (3b103), 2.000mg manganese-II-oxide (3b502), 500mg copper (sulfate-II-pentahydrate) (3b405), 4.000mg zinc (oxide) (3b603), 80mg iodine (coated granulated calcium iodate anhydrous) (3b203), 60mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 10mg selenium (coated granulated sodium selenite) (3b802) 10 mg, 15.000 I.U. vitamin A (3a672a), 2.500 I.U. vitamin D3 (3a671), 70mg vitamin E (3a700), 90mg vitamin B1 (3a821), 40mg vitamin B6 (3a831), 1,5mg vitamin B12 (cyanocobalamin), 125mg niacin (nicotinic acid) (3a314), 110mg calcium-D-pantothenate (3a841), 25mg biotin (3a880)

### Zootechnical additives: 1

5x10<sup>9</sup> CFU Live yeast (4a1711)

# EQUIBLOCK

Mineral feed for horses, cattle, calves

## Lick block specially adapted to the needs of horses

EQUIBLOCK mineral lick has been specially developed for horses with its unique, high-quality combination of minerals, trace elements, vitamins and enzymes. EQUIBLOCK thus actively supports the strengthening of the immune system and promotes resistance to disease. The combination of active ingredients in EQUIBLOCK can also have a positive effect on fertility, growth and the general health of the horse.

The basic ingredient of the lick block is high-quality Mediterranean Sea salt with natural iodine.

## Effects + benefits:

- Healthy horn and improved hoof growth through Biotin
- Supports and optimizes metabolism, fertility, blood circulation and growth
- Strengthens joints, tendons and connective tissue
- Healthy skin and hair due to improved keratin formation
- Maintaining a neutral pH value of the stomach
- Protection against cell damages (e.g. harmful environmental influences) due to the antioxidant effects of the minerals iron, selenium, zinc, manganese, and vitamin E
- Strengthens the immune system of the horse
- Increases productivity and wellbeing

Available in:

3kg

5kg

10kg

## Analytical ingredients:

34,8 % sodium (Na), 1,45% calcium (Ca), 1,5% magnesium (Mg), 0,5% phosphorus (P)

## Composition:

sodium chloride, magnesium oxide, calcium carbonate, dicalcium phosphate, molasses (0,3%)

## Nutritional Additives / kg:

1.500mg iron (sulphate monohydrate (II)) (3b103), 2.000mg manganese-II-oxide (3b502), 500mg copper (sulfate (II) pentahydrate) (3b405), 4.000mg zinc (oxide) (3b603), 80mg iodine (coated granulated calcium iodate anhydrous) (3b203), 60mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 10mg selenium (coated granulated sodium selenite) (3b802), 15.000 I.U. vitamin A (3a672a), 2.500 I.U. vitamin D3 (3a671), 70mg vitamin E (3a700), 90mg vitamin B1 (3a821), 40mg vitamin B6 (3a831), 1,5mg vitamin B12 (cyanocobalamin), 125mg niacin (nicotinic acid) (3a314), 110mg calcium-D-pantothenate (3a841), 25mg biotin (3a880)

imima

[www.imima.de/en](http://www.imima.de/en)

# MultiVitamin BRONCHIAL

Mineral feed for horses, cattle, sheep and goats

## Lick block with natural essential oils from mint and eucalyptus

MultiVitamin BRONCHIAL mineral lick contains minerals, trace elements and vitamins in addition to natural essential oils of mint and eucalyptus to soothe and relieve respiratory problems. Especially during cold and wet weather many horses suffer from respiratory problems and the immune system can be weakened. Especially then the MultiVitamin BRONCHIAL lick with its special combination of ingredients can help. The essential oils of mint and eucalyptus can have an expectorant effect, provide respiratory relief and thus have a soothing effect.

The rich combination of minerals, trace elements and vitamins strengthen the immune system.

Due to that, the MultiVitamin BRONCHIAL mineral lick is ideally suited to support the respiratory system and the wellbeing of the horse in a natural way.

The lick block is based on food-grade Mediterranean Sea salt with natural iodine.

## Effects + benefits:

- Relief to the respiratory passages
- Helps to loosen mucus
- Strengthening of the immune system
- Supports health and improves physical vitality
- Suited for permanent feeding

Available in:

3kg

5kg

10kg

## Analytical ingredients:

36,9% sodium (Na), 1,03% calcium (Ca), 0,35% magnesium (Mg), 0,27% phosphorus

## Composition:

sodium chloride, calcium carbonate, magnesium oxide, dicalcium phosphate, essential oils of mint and eucalyptus, molasses (0,3%)

## Additives / kg:

930mg iron (sulphate monohydrate (III)) (3b103), 273mg manganese-III-oxide (3b502), 145mg zinc (oxide) (3b603), 60mg iodine (coated granulated calcium iodate anhydrous) (3b203), 25mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 7,5mg selenium (coated granulated sodium selenite) (3b802), 15.000 IU Vitamin A (3a672a), 2.500 IU Vitamin D3 (3a671), 21,3 IU Vitamin E (3a700)

natural flavourings

imima

[www.imima.de/en](http://www.imima.de/en)

# VITAMIN PLUS *Selen*

Mineral feed for horses, cattle, sheep, goats and deer

## Mineral lick made of natural Mediterranean salt, rich in vitamins plus selenium

The high-quality formula of this lick with selenium in combination with vitamins A, D3 and E has a very positive effect on the immune system and metabolic processes of the horse.

Sufficient supply of vitamins and selenium can protect the cells of the horse from harmful influences and support the production of antibodies. Since most soils today are very low in selenium, the selenium content in the basic feed, such as hay and grass, is consequently also too low or deficient. The lick Vitamin Plus Selenium can prevent a deficiency and the health and vitality of the horse can be maintained or increased.

The contained selenium, in inorganic and organic form, has a very high bioavailability to efficiently counteract a selenium deficiency.

### Effect + benefits:

- Can protect the cells of the horse from harmful influences
- Can support the production of anti-bodies
- Counteracts selenium deficiency in horses
- Supports a healthy, balanced diet
- For more vitality and productivity

Available in:

3kg

5kg

10kg

### Analytical ingredients:

37,5% sodium (Na), 0,79% calcium (Ca), 0,35% magnesium (Mg), 0,25% phosphorus (P)

### Composition:

sodium chloride, calcium carbonate, dicalcium phosphate, magnesium oxide, molasses (0,2%)

### Nutritional additives / kg:

930mg iron (sulphate monohydrate (III)) (3b103), 273mg manganese (oxide) (3b502), 145mg zinc (oxide) (3b603), 60mg iodine (coated granulated calcium iodate anhydrous) (3b203), 25mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 25mg selenium (coated granulated sodium selenite) (3b802), 10mg selenium (selenomethionine) (3b8.12, organic form), 22.500 IU Vitamin A (3a672a), 3.750 IU Vitamin D3 (3a671), 32mg Vitamin E (3a700)

imima

[www.imima.de/en](http://www.imima.de/en)

# BIOTIN + plus

Mineral feed for horses, cattle, sheep, goats and deer

## Lick block with BIOTIN and vitamin E

BIOTIN+ mineral lick ideally supplements the daily nutrition with salt, trace elements and biotin.

Biotin has a positive effect regarding to the structure and resilience of hooves and hair, which is scientifically proven. Biotin promotes the formation of keratin and thus the formation of horn can be supported. The strength of the hoof horn can be significantly improved.

The basic ingredient of BIOTIN+ mineral lick is very high-quality Mediterranean Sea salt with natural iodine enriched with trace elements, vitamin E and biotin. BIOTIN+ lick block is unique with its high-quality combination of active ingredients.

## Effects + benefits:

- Biotin for hoof health and high fur quality
- Strengthens the immune system
- Improved skin health
- For cows: protection against mastitis
- Improves milk quality and milk production

Available in:

3kg

5kg

10kg

## Analytical ingredients:

38% sodium (Na), 0,05% calcium (Ca), 0,04% magnesium (Mg)

## Composition:

sodium chloride, calcium carbonate, magnesium oxide, molasses (0,2%)

## Nutritional Additives / kg:

650 mg zinc (oxide) (3b603), 80mg iodine (coated granulated calcium iodate anhydrous) (3b203), 85mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 20mg selenium (coated granulated sodium selenite) (3b802), 1.000mg vitamin E (3a700), 50mg biotin (vitamin H) (3a880)

imima

[www.imima.de/en](http://www.imima.de/en)

# Super MAG

Mineral feed for horses, cattle, sheep, goats and deer

## Lick block with magnesium, calcium and phosphor

Magnesium is one of the most important minerals and is stored not only in the muscles, but together with calcium and phosphorus also in the bones (about 12% magnesium content) and teeth. Magnesium is considered as a key element for muscle formation, muscle metabolism and thus for loose and well working muscles.

SuperMAG mineral lick with its special combination of magnesium, calcium, phosphorus and other minerals is an ideal source for compensating an increased magnesium requirement. This is especially important for young animals, in stressful situations, weather-sensitive animals and older animals.

A good magnesium supply is often not guaranteed by basic feed. SuperMAG lick is perfect for ensuring a sufficient supply of magnesium, especially during grazing periods.

The high share of magnesium in SuperMAG can have a positive effect on the birth of healthy calves, lambs and foals.

SuperMAG can be used in an ecological production according to EG-organic farming regulation 889/2008 + 848/2018 VO (EG).

Available in:

3kg

5kg

10kg

## Effects + benefits:

- Relaxed and healthy muscles
- Vital and relaxed animals
- Avoids colic based on tense muscles
- Healthier new-borns
- Increased fertility
- Higher quality of colostrum
- Improved immune system, e.g. against laminitis (horses) and grass staggers
- Compensates the deficit of magnesium especially during pasture periods

## Analytical ingredients:

30% sodium (Na), 4,60% calcium (Ca), 2,36% magnesium (Mg), 1,05% phosphorus (P)

## Composition:

sodium chloride, magnesium oxide, calcium carbonate, dicalcium phosphate, molasses (0,3%)

## Nutritional Additives / kg:

6.000mg zinc (oxide) (3b603), 1.000mg manganese-II-oxide (3b502), 700mg iodine (coated granulated calcium iodate anhydrous) (3b203), 280mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 25mg selenium (coated granulated sodium selenite) (3b802)

imima

www.imima.de/en

# ZINCOBLOCK

Mineral feed for horses, cattle, sheep, goats and deer

## Lick block with zinc, iron, cobalt and selenium

Zinc deficiency is quite a common problem in horses and can be the cause of e.g. dull coat and brittle hoof horn. If there is too little zinc in the organism, toxins can't be bound and remain in the body. Due to the special combination of zinc, cobalt and selenium, ZINCOBLOCK mineral lick is suitable for the prevention of metabolic disorders, skin and coat problems, brittle hoof horn, muscle diseases and fertility problems.

ZINCOBLOCK can be used in an ecological production according to EG-organic farming regulation 889/2008 + 848/2018 VO (EG).

## Effects + benefits:

- Healthy growth of hoof, horn and coat
- Increases fertility
- Stronger immune system, e.g. against fungal disease
- Improvement of the general well-being
- Supports the natural detoxification process of the animals

Available in:

3kg

5kg

10kg

## Analytical ingredients:

38% sodium (Na), 0,30% calcium (Ca)

## Composition:

sodium chloride, calcium carbonate, molasses (0,2%)

## Nutritional Additives / kg:

9000mg zinc (oxide) (3b603), 1400mg iron (sulphate monohydrate (II)) (3b103), 400mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 20mg selenium (coated granulated sodium selenite) (3b802)

imima

[www.imima.de/en](http://www.imima.de/en)

# PREMIUMBLOCK

Mineral feed for horses, cattle, sheep, goats and deer

## Lick block with trace elements and natural Mediterranean Sea salt

Salt and trace elements are essential parts of daily nutrition and ensure good performance and productivity. PREMIUMBLOCK ideally supplements the daily food with salt and trace elements. Consequently, it can contribute to the prevention of deficiency diseases as well as a balanced metabolism and good health in general.

The basic ingredient of PREMIUMBLOCK is high-quality Mediterranean Sea salt with natural iodine, which has been enriched with trace elements.

The sea salt for our lick blocks is exclusively extracted within the EU and is subject to strict quality control. The production follows the high European environmental and social standards.

PREMIUMBLOCK can be used in an ecological production according to EG-organic farming regulation 889/2008 + 848/2018 VO (EG).

Available in:

3kg

5kg

10kg

The product is available in red or white.

### Analytical ingredients:

38,8% sodium (Na), 0,035% magnesium (Mg)

### Composition:

sodium chloride, magnesium oxide

### Additives / kg:

93mg iron [sulphate monohydrate (II)] (3b103), 27,3mg manganese-II-oxide (3b502), 14,5mg zinc (oxide) (3b603), 6mg iodine (coated granulated calcium iodate anhydrous) (3b203), 2,5mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 0,75mg selenium (coated granulated sodium selenite) (3b802)

# MEDITERRANEO

Mineral feed for horses, cattle, sheep, goats and deer

## Lick block with natural Mediterranean Sea salt

Salt is the most important mineral for horses, cattle, sheep and goats. The natural salt content of grass and hay does not satisfy the needs of the animals.

MEDITERRANEO lick provides high-quality, natural sea salt in food grade quality to the animals. Salt is instrumentally important for the nervous and muscular systems of animals. Firstly, salt regulates the water absorption of the tissues and consequently the fluid balance in the body and prevents dehydration, which in turn reduces the risk of colic. Secondly, salt is also needed for glucose transport between cell membranes. A deficit would lead to fatigue, muscle weakness and loss of performance.

Animals have a natural ability to sense their salt needs and with the help of the MEDITERRANEO lick, they can supply themselves according to their individual needs. The sea salt for our lick blocks is exclusively extracted within the EU and is subject to strict quality control. The production follows the high European environmental and social standards.

MEDITERRANEO can be used in an ecological production according to EG-organic farming regulation 889/2008 + 848/2018 VO (EG).

# Leckerli-Lick

## MINERAL BOOST

### The small healthy lick bowl for in-between

Our treat licks are true mineral boosters and are perfect for rewarding horses or distracting and calming them during visits to the vet or farrier.

Leckerli Licks are made with lots of good ingredients: Natural molasses (much better and healthier than glucose in our opinion), high quality organic and inorganic minerals, trace elements and vitamins.

Molasses is very tasty for horses and as a purely natural product very rich in minerals. Molasses supplies the trace element chromium, which is important for horses, in a natural way. In fact, molasses is considered the most chromium-rich component in horse feed. Chromium has a positive influence on the energy metabolism and nervous system of horses.

#### Effects + benefits:

- High mineral and vitamin content for healthy hooves and beautiful coat
- Natural ingredients: no artificial stabilizers and no preservatives
- Tasty, healthy treat for in-between meals
- Allows controlled intake of natural molasses
- Rich in chromium for a positive influence on the energy metabolism and the nervous system
- Healing clay (bentonite) stimulates detoxification processes

Available in the following flavors in a handy 750g bowl:

- Mineral Boost
- Mineral Boost with Bronchial
- Mineral Boost with Hemp / CBD

Bronchial for the soothing of respiratory problems

Hemp for strengthening the nerves

Available in:

**750g**

**MADE IN EU**

#### Analytical constituents:

8% Crude protein, 45% Crude ash, 10,5% Calcium (Ca), 1,6% Phosphorus (P), 0,5% Magnesium (Mg), 2,75% Sodium (Na)

#### Composition:

Sugar beet molasses, Calcium carbonate, Dicalcium phosphate, Sodium chloride, Magnesium oxide, Sodium Bentonite, Calcite

#### Additives per kg:

1.000mg Manganese (Manganese oxide) (3b502), 1.100mg Zinc (Zinc oxide) (3b603), 100mg Zinc (Chelated) (3b606), 200mg Copper (Copper sulphate pentahydrate) (3b405), 30mg Iodine (Calcium iodate anhydrous) (3b202), 9mg Selenium (Sodium selenite) (3b801), 1mg Selenium (Organic) (3b8.10), 8mg Cobalt (Cobalt sulphate heptahydrate) (3b305), 35.000 I.E. Vitamin A (Retinyl acetate) (3a672a), 6.000 I.E. Vitamin D3 (Cholecalciferol) (3a671), 300mg Vitamin E (all-rac-alpha-tocopheryl acetate) (3a700), 0,3mg Vitamin B12 (Cyanocobalamin), 10mg Biotin (Vitamin H) (3a880),

#### Sensory Additives:

Natural flavors

# Lolly-Lick

*The healthy activity lick*

**The healthy lick toy made from natural sea salt, minerals and rich in vitamins**

Our Lolly-Lick is a great and healthy horse toy and provides more variety, whether in the box, on the paddock, or in the open stable and effectively helps against boredom or restlessness. The basic ingredient of the horse toy is high-quality Mediterranean salt with natural iodine, supplemented with minerals + trace elements and rich in vitamins.

Due to the holder the horse lolly can be freely suspended and invites to play.

Lolly-Licks also fit perfectly in a LIKIT-holder!

Lolly-Licks can be provided to the horse permanently, as they do not contain sugary glucose or molasses and are also grain-free.

# Lolly-Lick

The healthy activity lick

Our Lolly-Lick is available in various colourful flavours and each one is particularly tasty for horses. The recipes draw on the power of nature. Some of our varieties not only have a great taste, but also work in a natural way, for example with calming chamomile, with lavender against stress or with the superfood rosehip as a vitamin booster.

- Soothing with chamomile
- Breathable with mint and eucalyptus
- Stressless with lavender
- Vitamin Booster with rosehip
- Fruity & delicious with apple
- Simply delicious with vanilla & banana

#### Effects and benefits:

- Natural ingredients & innovative recipes
- The ideal, healthy horse toy
- Relieves restlessness and helps relieve stress
- Reduces boredom and resulting tics
- Supports a healthy diet

## ABOUT OUR MINERAL LICK BLOCKS

Traditionally simple salt and mineral lick blocks are known. However, our partner company S.I.N. HELLAS has shown that lick blocks are an excellent way to provide horses with further supplements. Since more than 25 years the company produces a wide variety of salt and mineral licks from pure Mediterranean salt in table salt quality and is now considered as the market leader for special and innovative lick blocks.

Special mineral lick blocks have been developed to allow horses to take in minerals, trace elements, vitamins, herbs, essential oils and even live yeast according to their individual needs.

With the help of our lick blocks deficiency symptoms and resulting diseases can be prevented. The animals remain vital and healthy and are more resistant to diseases.

Many years of experience have gone into each of our mineral lick blocks. The production is ISO 22000 and QS (Quality + Safety) certified. The lick blocks are developed in the EU and manufactured in Greece according to EU social and environmental standards. This brings not only a good feeling, but also the joy of the Greek sun to us and our animals.
