Our philosophy of free will feeding with a LICK BLOCK BAR

Horses have an instinct to cover their mineral requirements. They search for different sources of nutrients to absorb the amount of minerals and vitamins their bodies need.

Licking blocks serve this natural instinct very well. The animals are able to consume the licks at their own will and thus balance their individual needs.

The great advantage of a free will supply is that most deficiency symptoms and resulting diseases do not even occur. The animals remain vital and healthy and are more resistant to diseases.

With the help of a LICK BLOCK BAR the nutritional philosophy of "free will feeding" can be ideally implemented.

The LICK BLOCK BAR

LEADERS IN ANIMAL NUTRITION

With a LICK BLOCK BAR the animal is offered a selection of different licks at the same time.
The horse can ideally balance its individual needs for minerals, trace elements and vitamins at its own will.

Each of our lick blocks has been developed especially for horses and has a special recipe, always keeping in mind the horses' mineral requirements.

By offering different licks the animal can access its natural instinct and seek out different sources of nutrients.

A LICK BLOCK BAR is probably the highlight in every open stable, paddock or pasture!

HerbaBlock

Mineral feed for horses, cattle, sheep, goats and deer

LEADERS IN ANIMAL NUTRITION

Available in:

3kg

5kg

10kg

Mineral lick with wild herbs for an intestinal environment hostile to worms

The HerbaBlock is enriched with a special herbal mixture and thus naturally strengthens the intestinal environment against worm infestation. In addition to salt and trace elements certain herbs are absorbed. Due to their high content of bitter and tannic substances the intestinal environment becomes unfriendly to worms.

Previously, horses could find lots of bitter herbs in nature and ate them specifically to protect themselves naturally against excessive worm infestation. Since today's meadows hardly offer a selection of bitter herbs, we have enriched our HerbaBlock with just these herbs. To have less often a reason for chemical anti-worming, the intestines of the animals should be strengthened and supported with appropriate herbs.

HerbaBlock is doping-free according to the Anti-Doping and Medication Control Rules (ADMR) of the German Equestrian Federation (FN).

Effects and benefits:

- Strengthens the intestine for a worm-unfriendly intestinal environment
- Supports a healthy diet with help of special herbs
- May help reduce the need for chemical worming treatments
- Supports metabolism and general well-being
- May help to prevent deficiency diseases

Analytical ingredients:

37,5% sodium (Na), 0,5% calcium (Ca), 0,35% magnesium (Mg)

Composition:

sodium chloride, herb mix 1% (pumpkin seeds, walnut leaves, male fern herb, southernwood herb, coriander, wild garlic, dandelion herb), calcium carbonate, magnesium oxide, molasses 0,2%

Additives / kg:

930mg iron (sulphate monohydrate (II)) (3b103), 273mg manganese (oxide) (3b502), 145mg zinc (oxide) (3b603), 60mg iodine (coated granulated calcium iodate anhydrous) (3b203), 25mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 7,5mg selenium (coated granulated sodium selenite) (3b802)

ANTI - INSECT

Mineral feed for horses, cattle, sheep and goats

LEADERS IN ANIMAL NUTRITION

Lick block with insect deterrent

ANTI-INSECT is a special, patented mineral lick with natural active ingredients to deter insects. The special formula can help to keep flies, mosquitoes, fleas and other harmful insects away. In addition, the animal is supplied with minerals, trace elements and vitamins according to their individual needs.

Available in:

3kg

5kg

10kg

Effects + benefits:

- Can deter insects, which are hazardous to health, like flies, mosquitoes, fleas
- Can support the blood circulation and prevent arterial thrombosis
- Supports the immune system and can prevent bacterial diseases
- Promotes the maintenance of a neutral pH of the stomach
- Antioxidant effect due to the minerals iron, selenium, zinc, manganese and Vitamin E
- Improves digestion and metabolism
- Can reduce the stress factor caused by pesky insects

Analytical ingredients:

37,5% sodium (Na), 0,79% calcium (Ca), 0,35% magnesium (Mg), 0,25% phosphorus (P)

Composition:

sodium chloride, calcium carbonate, dicalcium phosphate, magnesium oxide, garlic based essential oils, molasses (0,3%)

Nutritional Additives / kg:

930mg iron (sulphate monohydrate (III)) (3b103), 273mg manganese-II-oxide (3b502), 145mg zinc (oxide) (3b603), 60mg iodine (coated granulated calcium iodate anhydrous) (3b203), 25mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 7,5mg selenium (coated granulated sodium selenite) (3b802), 15.000 IU vitamin A (3a672a), 2.500 IU vitamin D3 (3a671), 21,3 IU vitamin E (3a700)

Sensory additives:

natural flavourings

PROBIOTIC

Mineral feed for horses, cattle and goats

LEADERS IN ANIMAL NUTRITION

Lick block with live yeast from Levucell®

PROBIOTIC lick block improves the digestion and the immune system thanks to specific live yeast.

Effects + benefits:

- Live yeast increases the fibre digestion, which leads to higher feed efficiency and higher milk production
- Lowers the risk of laminitis for horses
- Strengthens the immune system
- Increases fertility
- Higher quality of the colostrum

Benefits especially for horses:

Live yeast increases the fiber digestion

With the live yeasts in PROBIOTIC, a higher digestibility of the fibre structure of hay or straw is achieved. The digestion of hay requires a very high activity level of the digesting bacteria located in the colon. The cellulose-splitting microorganisms are stabilized by the added live yeast and thus an improved digestive activity can be reached. Especially horses with a tendency to fecal water, mostly when switching from pasture to hay and straw, can benefit from feed supplement with live yeast.

Available in:

3kg

5kg

10kg

Live yeast has an immunogenic and anti-microbial effect on the horse

Living yeast cells in PROBIOTIC support a non-specific stimulation of the immune system. The special glycoprotein structure of the cell surface causes an immune response, which strengthens the immune system of the horse. The barrier function of the intestinal mucosa is supported by feeding live yeast. These yeasts can also bind bacterial toxins and prevent transmission of infectious agents to the intestinal of the horse and foster excretion.

Analytical ingredients:

34,8 % sodium (Na), 1,45% calcium (Ca), 1,5% magnesium (Mg), 0,5% phosphorus (P)

Composition:

sodium chloride, magnesium oxide, calcium carbonate, dicalcium phosphate, molasses (0,3%)

Nutritional Additives / kg:

1.500mg iron (sulphate monohydrate (III)) (3b103), 2.000mg manganese-II-oxide (3b502), 500mg copper (sulfate-II-pentahydrate) (3b405), 4.000mg zinc (oxide) (3b603), 80mg iodine (coated granulated calcium iodate anhydrous) (3b203), 60mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 10mg selenium (coated granulated sodium selenite) (3b802) 10 mg, 15.000 I.U. vitamin A (3a672a), 2.500 I.U. vitamin D3 (3a671), 70mg vitamin E (3a700), 90mg vitamin B1 (3a821), 40mg vitamin B6 (3a831), 1,5mg vitamin B12 (cyanocobalamin), 125mg niacin (nicotinic acid) (3a314), 110mg calcium-D-pantothenate (3a841), 25mg biotin (3a880)

Zootechnical additives:

15x10⁹ CFU Live yeast (4a1711)

SPIRULINA PLUS

Mineral feed for horses, cattle, sheep, goats and deer

LEADERS IN ANIMAL NUTRITION

Mineral lick with nutrient-rich spirulina algae

The spirulina algae is considered a superfood, as its nutrient richness in minerals, vitamins, proteins and antioxidants can have many positive influences on the animal's organism.

As a true nutrient bomb, spirulina can help to improve the natural function of the intestinal flora and metabolism and thus strengthen the immune system. The amino acids and proteins contained in spirulina can not only support the joints, tendons and muscles, but also the hooves, skin and coat.

Thanks to these many positive impacts, the SPIRULINA PLUS, can be used equally for leisure, sport and senior horses and is a good nutritional supplement during recovery from illness or during advanced training. The benefits of spirulina as a source of protein, iron and vitamin A are also undisputed and recognised by the WHO (World Health Organization). In addition, the ingredients of spirulina have a very good bioavailability.

The SPIRULINA PLUS is the first mineral lick block containing the spirulina algae. It combines high-quality spirulina powder with a complementary vitamin and mineral mixture. The horse is thus ideally supported holistically, no matter what situation in life!

Our SPIRULINA PLUS lick stone is doping-free according to the Anti-Doping and Drug Control Rules (ADMR) of the German Equestrian Federation (FN).

Available in:

3kg

5kg

10kg

Effects + benefits:

- With rich superfood algae spirulina and a perfectly balanced blend of vitamins and minerals
- Supports the animal's organism holistically
- May help improve the immune system, muscular system, joints, hooves and coat
- Suitable for horses during all stages in life
- May help prevent nutrient deficiencies
- Supports a healthy diet thanks to the unique formula

Analytical ingredients:

37,5% sodium (Na), 0,79% calcium (Ca), 0,35% magnesium (Mg), 0,25% phosphorus (P)

Composition:

sodium chloride, spirulina 1% (Arthrospira platensis, powder), calcium carbonate, dicalcium phosphate, magnesium oxide

Nutritional additives / kg:

930mg iron (sulphate monohydrate (II)) (3b103), 273mg manganese (oxide) (3b502), 145mg zinc (oxide) (3b603), 60mg iodine (coated granulated calcium iodate anhydrous) (3b203), 25mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 7,5mg selenium (coated granulated sodium selenite) (3b802), 15.000 IU Vitamin A (3a672a), 2.500 IU Vitamin D3 (3a671), 21,3mg Vitamin E (3a700)

EquiVital PLUS

Mineral feed for horses, cattle, calves

LEADERS IN ANIMAL NUTRITION

Lick block specially adapted to the needs of horses

EquiVital PLUS mineral lick has been specially developed for horses with its unique, high-quality combination of minerals, trace elements, vitamins and enzymes. EquiVital PLUS thus actively supports the strengthening of the immune system and promotes resistance to disease. The combination of active ingredients in EquiVital PLUS can also have a positive effect on fertility, growth and the general health of the horse.

The basic ingredient of the lick block is high-quality Mediterranean Sea salt with natural iodine.

Available in:

3kg

5kg

10kg

Effects + benefits:

- Healthy horn and improved hoof growth through Biotin
- Supports and optimizes metabolism, fertility, blood circulation and growth
- Strengthens joints, tendons and connective tissue
- Healthy skin and hair due to improved keratin formation
- Maintaining a neutral pH value of the stomach
- Protection against cell damages (e.g. harmful environmental influences) due to the antioxidant effects of the minerals iron, selenium, zinc, manganese, and vitamin E
- Strengthens the immune system of the horse
- Increases productivity and wellbeing

Analytical ingredients:

34,8 % sodium (Na), 1,45% calcium (Ca), 1,5% magnesium (Mg), 0,5% phosphorus (P)

Composition:

sodium chloride, magnesium oxide, calcium carbonate, dicalcium phosphate, molasses (0,3%)

Nutritional Additives / kg:

1.500mg iron (sulphate monohydrate (III)) (3b103), 2.000mg manganese-II-oxide (3b502), 500mg copper (sulfate (II) pentahydrate) (3b405), 4.000mg zinc (oxide) (3b603), 80mg iodine (coated granulated calcium iodate anhydrous) (3b203), 60mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 10mg selenium (coated granulated sodium selenite) (3b802), 15.000 I.U. vitamin A (3a672a), 2.500 I.U. vitamin D3 (3a671), 70mg vitamin E (3a700), 90mg vitamin B1 (3a821), 40mg vitamin B6 (3a831), 1,5mg vitamin B12 (cyanocobalamin), 125mg niacin (nicotinic acid) (3a314), 110mg calcium-D-pantothenate (3a841), 25mg biotin (3a880)

imima

MultiVitamin BRONCHIAL

Mineral feed for horses, cattle, sheep and goats

LEADERS IN ANIMAL NUTRITION

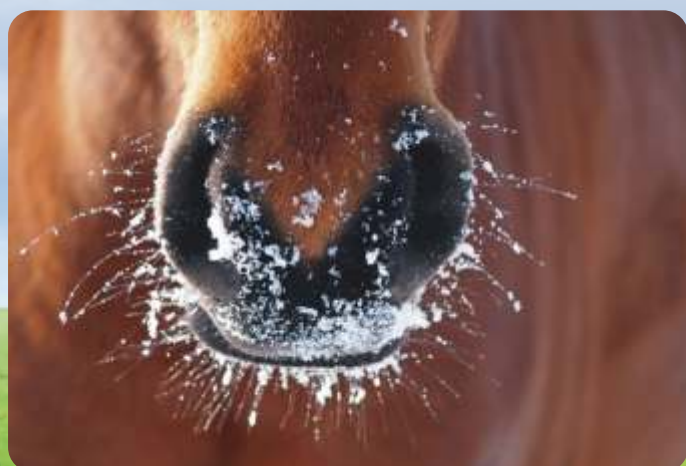

Lick block with natural essential oils from mint and eucalyptus

MultiVitamin BRONCHIAL mineral lick contains minerals, trace elements and vitamins in addition to natural essential oils of mint and eucalyptus to soothe and relieve respiratory problems. Especially during cold and wet weather many horses suffer from respiratory problems and the immune system can be weakened. Especially then the MultiVitamin BRONCHIAL lick with its special combination of ingredients can help. The essential oils of mint and eucalyptus can have an expectorant effect, provide respiratory relief and thus have a soothingly effect.

The rich combination of minerals, trace elements and vitamins strengthen the immune system.

Due to that, the MultiVitamin BRONCHIAL mineral lick is ideally suited to support the respiratory system and the wellbeing of the horse in a natural way.

The lick block is based on food-grade Mediterranean Sea salt with natural iodine.

Available in:

3kg

5kg

10kg

Effects + benefits:

- Relief to the respiratory passages
- Helps to loosen mucus
- Strengthening of the immune system
- Supports health and improves physical vitality
- Suited for permanent feeding

Analytical ingredients:

36,9% sodium (Na), 1,03% calcium (Ca), 0,35% magnesium (Mg), 0,27% phosphorus

Composition:

sodium chloride, calcium carbonate, magnesium oxide, dicalcium phosphate, essential oils of mint and eucalyptus, molasses (0,3%)

Additives / kg:

930mg iron (sulphate monohydrate (II)) (3b103), 273mg manganese-II-oxide (3b502), 145mg zinc (oxide) (3b603), 60mg iodine (coated granulated calcium iodate anhydrous) (3b203), 25mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 7,5mg selenium (coated granulated sodium selenite) (3b802), 15.000 IU Vitamin A (3a672a), 2.500 IU Vitamin D3 (3a671), 21,3 IU Vitamin E (3a700)

Sensory additives:

natural flavourings

VITAMIN PLUS *Selen*

Mineral feed for horses, cattle, sheep, goats and deer

LEADERS IN ANIMAL NUTRITION

Mineral lick made of natural Mediterranean salt, rich in vitamins plus selenium

The high-quality formula of this lick with selenium in combination with vitamins A, D3 and E has a very positive effect on the immune system and metabolic processes of the horse.

Sufficient supply of vitamins and selenium can protect the cells of the horse from harmful influences and support the production of antibodies. Since most soils today are very low in selenium, the selenium content in the basic feed, such as hay and grass, is consequently also too low or deficient. The lick Vitamin Plus Selenium can prevent a deficiency and the health and vitality of the horse can be maintained or increased.

The contained selenium, in inorganic and organic form, has a very high bioavailability to efficiently counteract a selenium deficiency.

Available in:

3kg

5kg

10kg

Effect + benefits:

- Can protect the cells of the horse from harmful influences
- Can support the production of anti-bodies
- Counteracts selenium deficiency in horses
- Supports a healthy, balanced diet
- For more vitality and productivity

Analytical ingredients:

37,5% sodium (Na), 0,79% calcium (Ca), 0,35% magnesium (Mg), 0,25% phosphorus (P)

Composition:

sodium chloride, calcium carbonate, dicalcium phosphate, magnesium oxide, molasses (0,2%)

Nutritional additives / kg:

930mg iron (sulphate monohydrate (II)) (3b103), 273mg manganese (oxide) (3b502), 145mg zinc (oxide) (3b603), 60mg iodine (coated granulated calcium iodate anhydrous) (3b203), 25mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 25mg selenium (coated granulated sodium selenite) (3b802), 10mg selenium (selenomethionine) (3b8.12, organic form), 22.500 IU Vitamin A (3a672a), 3.750 IU Vitamin D3 (3a671), 32mg Vitamin E (3a700)

BIOTIN + plus

Mineral feed for horses, cattle, sheep, goats and deer

LEADERS IN ANIMAL NUTRITION

Lick block with BIOTIN and vitamin E

BIOTIN+ mineral lick ideally supplements the daily nutrition with salt, trace elements and biotin.

Biotin has a positive effect regarding to the structure and resilience of hooves and hair, which is scientifically proven. Biotin promotes the formation of keratin and thus the formation of horn can be supported. The strength of the hoof horn can be significantly improved.

The basic ingredient of BIOTIN+ mineral lick is very high-quality Mediterranean Sea salt with natural iodine enriched with trace elements, vitamin E and biotin.

BIOTIN+ lick block is unique with its high-quality combination of active ingredients.

Available in:

3kg

5kg

10kg

Effects + benefits:

- Biotin for healthy hooves and coat
- Strengthens the horse's immune system
- Can have a positive effect on the horse's skin health
- Supports a healthy diet

Analytical ingredients:

38% sodium (Na), 0,05% calcium (Ca), 0,04% magnesium (Mg)

Composition:

sodium chloride, calcium carbonate, magnesium oxide, molasses (0,2%)

Nutritional Additives / kg:

650 mg zinc (oxide) (3b603), 80mg iodine (coated granulated calcium iodate anhydrous) (3b203), 85mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 20mg selenium (coated granulated sodium selenite) (3b802), 1.000mg vitamin E (3a700), 50mg biotin (vitamin H) (3a880)

Super MAG

Mineral feed for horses, cattle, sheep, goats and deer

LEADERS IN ANIMAL NUTRITION

Available in:

3kg

5kg

10kg

Lick block with magnesium, calcium and phosphor

Magnesium is one of the most important minerals and is stored not only in the muscles, but together with calcium and phosphorus also in the bones (about 12% magnesium content) and teeth.

Magnesium is considered as a key element for muscle formation, muscle metabolism and thus for loose and well working muscles.

SuperMAG mineral lick with its special combination of magnesium, calcium, phosphorus and other minerals is an ideal source for compensating an increased magnesium requirement. This is especially important for young animals, in stressful situations, weather-sensitive animals and older animals.

A good magnesium supply is often not guaranteed by basic feed. SuperMAG lick is perfect for ensuring a sufficient supply of magnesium, especially during grazing periods.

The high share of magnesium in SuperMAG can have a positive effect on the birth of healthy calves, lambs and foals.

Effects + benefits:

- Loose and healthy muscles
- Relaxed and vital animals
- Avoids colic based on tense muscles
- Improved immune system, e.g. against laminitis
- Compensates the deficit of magnesium, especially during pasture periods
- Improved fertility
- Vital and healthy foals
- Improved quality of colostrum (colostrum)

Our SuperMAG mineral lick can be used in an ecological production according to EG-organic farming regulation 889/2008 + 848/2018 VO (EG).

Analytical ingredients:

30% sodium (Na), 4,60% calcium (Ca), 2,36% magnesium (Mg), 1,05% phosphorus (P)

Composition:

sodium chloride, magnesium oxide, calcium carbonate, dicalcium phosphate, molasses (0,3%)

Nutritional Additives / kg:

6.000mg zinc (oxide) (3b603), 1.000mg manganese-II-oxide (3b502), 700mg iodine (coated granulated calcium iodate anhydrous) (3b203), 280mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 25mg selenium (coated granulated sodium selenite) (3b802)

ZINCOBLOCK

Mineral feed for horses, cattle, sheep, goats and deer

LEADERS IN ANIMAL NUTRITION

Available in:

3kg

5kg

10kg

Lick block with zinc, iron, cobalt and selenium

Zinc deficiency is quite a common problem in horses and can be the cause of e.g. dull coat and brittle hoof horn. If there is too little zinc in the organism, toxins can't be bound and remain in the body. Due to the special combination of zinc, cobalt and selenium, ZINCOBLOCK mineral lick is suitable for the prevention of metabolic disorders, skin and coat problems, brittle hoof horn, muscle diseases and fertility problems.

Effects + benefits:

- Healthy growth of hoof, horn and coat
- Increases fertility
- Stronger immune system, e.g. against fungal disease
- Improvement of the general well-being
- Supports the natural detoxification process of the animals

Our ZINCOBLOCK mineral lick can be used in an ecological production according to EG-organic farming regulation 889/2008 + 848/2018 VO (EG).

Analytical ingredients:

38% sodium (Na), 0,30% calcium (Ca)

Composition:

sodium chloride, calcium carbonate, molasses (0,2%)

Nutritional Additives / kg:

9000mg zinc (oxide) (3b603), 1400mg iron (sulphate monohydrate (II)) (3b103), 400mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 20mg selenium (coated granulated sodium selenite) (3b802)

Lick block with trace elements and natural Mediterranean Sea salt

Salt and trace elements are essential parts of daily nutrition and ensure good performance and productivity. PREMIUMBLOCK ideally supplements the daily food with salt and trace elements.

Consequently, it can contribute to the prevention of deficiency diseases as well as a balanced metabolism and good health in general.

The basic ingredient of PREMIUMBLOCK is high-quality Mediterranean Sea salt with natural iodine, which has been enriched with trace elements.

The sea salt for our lick blocks is exclusively extracted within the EU and is subject to strict quality control. The production follows the high European environmental and social standards.

The product is available in red or white.

Our PREMIUMBLOCK mineral lick can be used in an ecological production according to EG-organic farming regulation 889/2008 + 848/2018 VO (EG).

Analytical ingredients:

38,8% sodium (Na), 0,035% magnesium (Mg)

Composition:

sodium chloride, magnesium oxide

Additives / kg:

93mg iron (sulphate monohydrate (II)) (3b103), 27,3mg manganese-II-oxide (3b502), 14,5mg zinc (oxide) (3b603), 6mg iodine (coated granulated calcium iodate anhydrous) (3b203), 2,5mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 0,75mg selenium (coated granulated sodium selenite) (3b802)

MEDITERRANEO

Mineral feed for horses, cattle, sheep, goats and deer

LEADERS IN ANIMAL NUTRITION

Available in:

3kg

5kg

10kg

Lick block with natural Mediterranean Sea salt

Salt is the most important mineral for horses, cattle, sheep and goats. The natural salt content of grass and hay does not satisfy the needs of the animals.

MEDITERRANEO lick provides high-quality, natural sea salt in food grade quality to the animals.

Salt is instrumentally important for the nervous and muscular systems of animals. Firstly, salt regulates the water absorption of the tissues and consequently the fluid balance in the body and prevents dehydration, which in turn reduces the risk of colic. Secondly, salt is also needed for glucose transport between cell membranes. A deficit would lead to fatigue, muscle weakness and loss of performance.

Animals have a natural ability to sense their salt needs and with the help of the MEDITERRANEO lick, they can supply themselves according to their individual needs.

The sea salt for our lick blocks is exclusively extracted within the EU and is subject to strict quality control. The production follows the high European environmental and social standards.

Our MEDITERRANEO salt lick can be used in an ecological production according to EG-organic farming regulation 889/2008 + 848/2018 VO (EG).

Analytical ingredients:
39% sodium (Na)

Composition:
sodium chloride

Lolly-Lick

The healthy activity lick

SUGAR FREE

Our Lolly-Lick is a great and sugarfree horse toy and provides more variety, whether in the box, on the paddock, or in the open stable and effectively helps against boredom or restlessness. The basic ingredient of the horse toy is high-quality Mediterranean salt with natural iodine, supplemented with minerals + trace elements and rich in vitamins.

- Healthy horse toy: Molasses-, glucose- and grain-free
- Made from natural sea salt and rich in vitamins
- Relieves restlessness and avoids boredom
- Supports a healthy diet

With our suspension rope, the horse toy can be hung freely and invites the horse to play and keep occupied. As a refill, Lolly-Licks also fit into Likit™ holders.

SUGAR FREE

Our Lolly-Lick is available in various colourful flavours and each one is particularly tasty for horses. The recipes draw on the power of nature. Some of our varieties not only have a great taste, but also work in a natural way, for example with calming chamomile, with lavender against stress or with the superfood rosehip as a vitamin booster.

- Soothing with chamomile
- Beneficial for the respiratory system with mint and eucalyptus
- Stressless with lavender
- Vitamin Booster with rosehip
- Fruity & delicious with apple
- Simply delicious with vanilla & banana

Analytical ingredients: 37,7% sodium (Na), 0,6% calcium (Ca), 0,27% magnesium (Mg), 0,19% phosphorus (P)

Composition: Sodium chloride, dicalcium phosphate, calcium carbonate, magnesium oxide, Depending on the variety: Camomile (in powder form) / rosehip (in powder form) / lavender (in powder form) / apple aroma / banana + vanilla aroma / essential oils of mint and eucalyptus

Nutritional Additives / kg: 697mg iron (sulphate monohydrate (II)) (3b103), 205mg manganese-II-oxide (3b502), 109mg zinc (oxide) (3b603), 45mg iodine (coated granulated calcium iodate anhydrous) (3b203), 19mg cobalt (coated granulated cobalt (II) carbonate) (3b304), 5,7mg selenium (coated granulated sodium selenite) (3b802), 16.875 IU vitamin A (3a672a), 2.812 IU vitamin D3 (3a671), 24mg IU vitamin A (3a700)

ABOUT US AND OUR PRODUCTS

LEADERS IN ANIMAL NUTRITION

Traditionally simple salt and mineral lick blocks are known. However, our partner company S.I.N. HELLAS has shown that lick blocks are an excellent way to provide horses with further supplements. Since more than 25 years the company produces a wide variety of salt and mineral licks from pure Mediterranean salt in table salt quality and is now considered as the market leader for special and innovative lick blocks.

Special mineral lick blocks have been developed to allow horses to take in minerals, trace elements, vitamins, herbs, essential oils, Spirulina and even live yeast according to their individual needs.

With the help of our lick blocks deficiency symptoms and resulting diseases can be prevented. The animals remain vital and healthy and are more resistant to diseases.

Many years of experience have gone into each of our mineral lick blocks. The production is ISO 22000 and QS (Quality + Safety) certified. The lick blocks are developed in the EU and manufactured in Greece according to EU social and environmental standards. This brings not only a good feeling, but also the joy of the Greek sun to us and our animals.
