PROBIOTIC

Mineral feed for cattle, horses, sheep and goats

Mineral lick with live yeasts Levucell®

The PROBIOTIC mineral lick improves the digestion and the immune system thanks to specific live yeast.

Benefits:

- Live yeast increases the fibre digestion, which leads to higher feed efficiency and higher milk production
- Lowers the risk of laminitis for horses
- Reduces the symptoms of metabolic acidosis so the level of milk production can be improved
- Strengthens the immune system
- Increases fertility
- Higher quality of the colostrum

Live yeast increases the fiber digestion

With the live yeasts in PROBIOTIC a higher digestibility of the fibre structure of hay or straw is achieved. The digestion of hay requires a very high activity level of the digesting bacteria located in the colon. The cellulose-splitting microorganisms are stabilized by the added live yeast and thus an improved digestive activity can be reached. Especially animals with a tendency to fecal water, mostly when switching from pasture to hay and straw, can benefit from feed supplement with live yeast.

Mineral feed for cattle

Analytical ingredients:

35.1% sodium, 1.65% calcium, 1.05 % phosphorus, 0.46% magnesium

Composition: Sodium chloride, magnesium oxide, calcium carbonate, dicalcium phosphate.

Nutritional additives/kg:

1,500mg iron [iron(II) sulphate monohydrate, 3b103], 2,000mg manganese [manganese(II) oxide, 3b502], 500mg copper [copper(II) sulphate pentahydrate, 3b405], 4,000mg zinc [zinc oxide, 3b603], 80mg iodine [granulated calcium iodate anhydrous, 3b203], 60mg cobalt [granulated cobalt(II) carbonate, 3b304], 10mg selenium [granulated sodium selenite, 3b802], 15,000 IU Vitamin A [3a672a], 2,500 IU Vitamin D3 [3a671], 70mg Vitamin E [3a700], 90mg Vitamin B1 [3a821], 40mg Vitamin B6 [3a831], 1.5mg Vitamin B12 (cyanocobalamin), 125mg Niacin [3a314], 110mg Calcium D-pantothenate [3a841], 25mg Biotin [3a880]

Technological additives:

576mg silicic acid [E551a]

Zootechnical additive: 15x10⁹ CFU *Saccharomyces cerevisiae* CNCM I-1077 [4a1711]

Mineral feed for sheep and goats

Analytical ingredients:

35.5% sodium, 1.65% calcium, 1.05% phosphorus, 0.46% magnesium

Composition:

sodium chloride, dicalcium phosphate, calcium carbonate, magnesium oxide

Nutritional additives/kg:

1,240mg iron [iron(II) sulphate monohydrate, 3b103], 365mg manganese [manganese(II) oxide, 3b502], 195mg zinc [zinc oxide, 3b603], 80mg iodine [granulated calcium iodate anhydrous, 3b203], 35mg cobalt [granulated cobalt(II) carbonate, 3b304], 10mg selenium [granulated sodium selenite, 3b802], 20,000 IU Vitamin A [3a672a], 3,300 IU Vitamin D3 [3a671], 28.5mg Vitamin E [3a700]

Zootechnical additive:

10x10⁹ CFU *Saccharomyces cerevisiae* CNCM I-1077 [4b1711]

5kg

10kg

Mineral lick with Icelandic Moss, Echinacea, and Rosehip Extract

PRO IMMUN Natural combines the power of proven plant extracts with high-quality minerals to create an optimal formula tailored to support the immune system. The specialized blend of valuable herbs and natural vitamin C from rosehips supports natural defenses and can help promote respiratory wellness.

Icelandic Moss is known for its protective effect on mucous membranes, helping to soothe cough irritation and support anti-inflammatory processes.

Echinacea is a well-established immune activator that can strengthen the organism, particularly during periods of respiratory stress.

Rosehip ideally complements the formula, as its high vitamin C content helps protect the body against infections and strengthens immune defense.

Benefits:

- Unique formula featuring Icelandic moss, echinacea, and rosehip
- Supports the immune system naturally and holistically
- Strengthens immune defenses against respiratory infections
- Soothing effect on mucous membranes
- Can relieve cough irritation and inhibit inflammation

Analytische Bestandteile:

37,8% Natrium, 0,49% Calcium, 0,35% Magnesium, 0,25% Phosphor

Zusammensetzung:

Natriumchlorid, Calciumcarbonat, Dicalciumphosphat, Magnesiumoxid, Kräutermischung (Isländisch Moos, Echinacea, Hagebutte)

Ernährungsphysiologische Zusatzstoffe/kg:

930mg Eisen [Eisen(II)-sulfat-Monohydrat, 3b103], 273mg Mangan [Mangan(II)-oxid, 3b502], 145mg Zink [Zinkoxid, 3b603], 60mg Jod [Kalziumjodat granuliert (beschichtet, wasserfrei), 3b203], 25mg Kobalt [Kobalt(II)-carbonat granuliert (beschichtet), 3b304], 7,5mg Selen [Natriumselenit granuliert (beschichtet), 3b802]

HerbaBlock

Mineral feed for horses, cattle, sheep, goats and deer

Mineral lick with wild herbs for an intestinal ambience hostile to worms

The HerbaBlock is enriched with a special herbal mixture and thus naturally strengthens the intestinal environment against a worm population. In addition to salt and trace elements certain herbs are absorbed, which make the intestinal environment worm-unfriendly due to their high content of bitter and tanning substances. In wild living animals these substances, which are ingested via plants and herbs, help to prevent excessive or pathological worm infestation through healthy nutrition. Therefore, in order to have less of a reason for chemical worming treatments, the animals' intestines should be strengthened and supported with appropriate herbs.

Our HerbaBlock is doping-free due to German FN "anti doping and medication control rules" (ADMR).

Effects and benefits:

- Strengthens the intestine for a worm-unfriendly intestinal environment
- Supports a healthy diet with help of special herbs
- May help reduce the need for chemical worming treatments
- Supports metabolism and general well-being
- May help prevent deficiency diseases

ANTI - INSECT

Mineral feed for cattle, sheep and goats

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

**MADE
IN EU**

Available in:

3kg

5kg

10kg

Mineral lick with insect deterrent effect plus vitamins

The ANTI-INSECT is a special, patented mineral lick with natural active ingredients to deter insects. The special formula can help to keep flies, mosquitoes, fleas and other harmful insects away. In addition, the animal is supplied with minerals, trace elements and vitamins according to their individual needs.

Benefits:

- Protection against insects, which are hazardous to health, like flies, mosquitoes and fleas
- Supports the blood circulation and prevents arterial thrombosis
- Strengthens the immune system
- Reduces vulnerability for bacterial disease
- Supports a neutral pH in the stomach
- Protection against cell damages (e.g. caused by harmful environmental influences) through antioxidant minerals like iron, selenium, zinc, manganese and Vitamin E
- Improves digestion and metabolism

Analytical ingredients:

37.5% sodium, 0.79% calcium, 0.35% magnesium, 0.25% phosphorus

Composition:

Sodium chloride, calcium carbonate, dicalcium phosphate, magnesium oxide

Nutritional additives/kg:

930mg iron [iron(II) sulphate monohydrate, 3b103], 273mg manganese [manganese(II) oxide, 3b502], 145mg zinc [zinc oxide, 3b603], 60mg iodine [granulated calcium iodate anhydrous, 3b203], 25mg cobalt [granulated cobalt(II) carbonate, 3b304], 7.5mg selenium [granulated sodium selenite, 3b802], 15,000 IU Vitamin A [3a672a], 2,500 IU Vitamin D3 [3a671], 21.3mg Vitamin E [3a700]

Sensory additives:

essential oil mixture (garlic-based)

ANTI - KETOSIS

Mineral feed for cattle, sheep and goats

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

Available in:

5kg

10kg

MADE IN EU

Mineral lick to support energy metabolism

The start of lactation presents special challenges for the metabolism of dairy cows and other ruminants. Due to the sharply increasing energy demand after calving, a strained energy balance often occurs. This can affect activity, feed intake, milk yield, and fertility.

The ANTI-KETOSIS mineral lick provides valuable minerals combined with propylene glycol as a readily available energy source. In addition to a diet tailored to the animal's needs, it can help support liver and rumen metabolism during phases of increased demand and stabilize the energy balance.

Benefits:

- Can support energy metabolism during critical performance phases
- Provides a valuable glucose precursor to supplement energy reserves before and after birth
- Can contribute to a balanced metabolic and hormonal balance
- Can help maintain natural milk production levels
- Supports general vitality and metabolic stability
- Can positively support physiological reproduction and fertility

Analytical ingredients:

36.7% sodium, 0.83% calcium, 0.31% magnesium, 0.22% phosphorus

Composition:

Sodium chloride, dicalcium phosphate, calcium carbonate, magnesium oxide, molasses, monopropylene glycol, glycerin

Nutritional additives/kg:

930mg iron [iron(II) sulphate monohydrate, 3b103], 273mg manganese [manganese(II) oxide, 3b502], 145mg zinc [zinc oxide, 3b603], 60mg iodine [calcium iodate granulated (coated, anhydrous), 3b203], 25mg cobalt [cobalt(II) carbonate granulated (coated), 3b304], 7.5mg selenium [sodium selenite granulated (coated), 3b802], 15,000 IU Vitamin A [3a672a], 2,500 IU Vitamin D3 [3a671], 21.3 mg Vitamin E [3a700], 375 mg niacin [nicotinic acid, 3a314]

ANTI - ACIDOSIS

Mineral feed for cattle, sheep and goats

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

Available in:

5kg

10kg

**MADE
IN EU**

Mineral lick to support a healthy rumen environment

A balanced digestion is the foundation for health, well-being, and performance in ruminants. Fluctuations in rumen pH levels can strain the microbial environment in the stomach and negatively affect overall well-being as well as milk yield.

The ANTI-ACIDOSIS lick combines valuable minerals with sodium bicarbonate. In addition to a diet rich in fiber, it can help naturally buffer the acid-base balance in the rumen and support physiological digestive function.

Benefits:

- Can contribute to maintaining an optimal pH level in the rumen
- Supports the buffering of acid spikes in the digestive tract
- Can positively influence milk quality
- Can act as an appetite stimulant, thereby promoting steady feed intake
- Can support the overall vitality and metabolic stability of the animals

Analytical ingredients:

34.60% sodium, 7% calcium, 0.32% magnesium, 0.23% phosphorus

Composition:

Sodium chloride, sodium bicarbonate, calcium carbonate, dicalcium phosphate, magnesium oxide

Nutritional additives/kg:

930mg iron [iron(II) sulfate monohydrate, 3b103], 273mg manganese [manganese(II) oxide, 3b502], 145mg zinc [zinc oxide, 3b603], 60mg iodine [calcium iodate anhydrous granulated, 3b203], 25mg cobalt [cobalt(II) carbonate granulated, 3b304], 7.5mg selenium [sodium selenite granulated, 3b802], 15,000 IU Vitamin A [3a672a], 2,500 IU Vitamin D3 [3a671], 21.3 mg Vitamin E [3a700]

ANTI - STONE

Mineral feed for cattle, sheep and goats

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

Available in:

5kg

10kg

**MADE
IN EU**

Mineral lick to support healthy urinary tract function

A balanced mineral supply is essential for the well-being of rams, bucks, and all other ruminants. Rations high in grain or an unbalanced mineral ratio can put stress on the urinary system.

The ANTI-STONE mineral lick was specially developed to provide the ration with an optimal calcium-to-phosphorus ratio of 2:1. As a supplement to daily feeding, it supports the physiological function of the urinary tract and contributes to a stable mineral balance.

Benefits:

- Supports the maintenance of an optimal calcium-to-phosphorus ratio of 2:1
- Can support natural urinary tract function and normal urine excretion
- Helps compensate for feed-related imbalances in the mineral balance
- Can promote the overall vitality and metabolic stability of the animals

Analytical ingredients:

35.75% sodium, 0.46% calcium, 0.35% magnesium, 0.23% phosphorus

Composition:

Sodium chloride, ammonium chloride, calcium carbonate, dicalcium phosphate, magnesium oxide

Nutritional additives/kg:

930mg iron [iron(II) sulphate monohydrate, 3b103], 273mg manganese [manganese(II) oxide, 3b502], 145mg zinc [zinc oxide, 3b603], 60mg iodine [calcium iodate granulated (coated, anhydrous), 3b203], 25mg cobalt [cobalt(II) carbonate granulated (coated), 3b304], 7.5mg selenium [sodium selenite granulated (coated), 3b802], 15,000 IU Vitamin A [3a672a], 2,500 IU Vitamin D3 [3a671], 21.3mg Vitamin E [3a700]

CALCIPHOS Plus

Mineral feed for cattle, sheep and goats

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

Available in:

5kg

10kg

MADE IN EU

Mineral lick, rich in calcium, phosphorus, and vitamins

Calcium and phosphorus play a central role in numerous biological processes within the organism of ruminants. Together, they are crucial for building and maintaining a stable bone structure. Phosphorus also supports cell division, natural growth, and contributes to regulating the body's acid-base balance.

The CALCIPHOS PLUS mineral lick combines a high content of calcium and phosphorus with essential vitamins A, D3, and E, as well as selected trace elements. It offers a high-quality supplement for ruminants across all life and performance stages.

Benefits:

- Can support the maintenance and development of strong bones and teeth
- Contributes to physiological muscle and nerve function
- Can positively accompany overall performance and productivity
- Helps naturally regulate the acid-base balance in the body
- Offers valuable support for young animals as well as pregnant animals or during phases of increased demand
- Can positively influence milk and colostrum quality
- Supports the healthy growth and vitality of young animals

Analytical ingredients:

24% sodium, 7.5% calcium, 7.5% phosphorus, 0.35% magnesium

Composition:

Sodium chloride, calcium carbonate, monocalcium phosphate, magnesium oxide

Nutritional additives/kg:

930mg iron [iron(II) sulfate monohydrate, 3b103], 273mg manganese [manganese(II) oxide, 3b502], 145mg zinc [zinc oxide, 3b603], 60mg iodine [calcium iodate granulated (coated, anhydrous), 3b203], 25mg cobalt [cobalt(II) carbonate granulated (coated), 3b304], 7.5mg selenium [sodium selenite granulated (coated), 3b802], 15,000 IU Vitamin A [3a672a], 2,500 IU Vitamin D3 [3a671], 21.3 mg Vitamin E [3a700]

CalfStarter

Mineral feed for calves

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

Available in:

5kg

10kg

MADE IN EU

Mineral lick to support healthy growth in calf rearing

A nutrient supply tailored to requirements in the first months of life lays the foundation for high-performing and vital animals. The CalfStarter mineral lick was specially developed for the special requirements of growing calves. Through the balanced ratio of calcium, phosphorus, and vitamin D3, the lick block accompanies stable bone development. B-complex vitamins (B1, B2, B6, B12) and vitamin E support energy metabolism as well as muscle development. In addition, the milk powder contained provides readily available energy, while the formula contributes to stabilizing the physiological rumen pH value.

Benefits:

- Can promote early intake of solid feed and roughage
- Supports the calf's natural immune defenses and overall vitality
- Can contribute to a well-groomed appearance as well as a healthy skin and coat structure
- Accompanies natural growth and muscle development through B vitamins and vitamin E
- Provides the growing calf specifically with essential minerals for optimal development
- Can contribute to stabilizing a balanced rumen pH level
- Supports the maintenance and development of a strong bone structure
- Provides an easily digestible energy source through the milk powder contained

Analytical ingredients:

29% sodium, 7% calcium, 1.5% magnesium, 0.55% phosphorus

Composition:

sodium chloride, magnesium oxide, calcium carbonate, dicalcium phosphate, milk powder, vegetable fat

Nutritional additives/kg:

4000mg zinc [zinc oxide, 3b603], 2000mg manganese [manganese(II) oxide, 3b502], 1500mg iron [iron(II) sulfate monohydrate, 3b103], 500mg copper [copper(II) sulfate pentahydrate, 3b405], 80mg iodine [calcium iodate granulated (coated, anhydrous), 3b203], 60mg cobalt [cobalt(II) carbonate granulated (coated), 3b304], 10mg selenium [sodium selenite granulated (coated), 3b802], 15250 IU vitamin A [3a672a], 2575 IU vitamin D3 [3a671], 73mg vitamin E [3a700], 90mg vitamin B1 [3a821], 40mg vitamin B6 [3a831], 1.9mg vitamin B12 (cyanocobalamin), 125mg nicotinic acid (niacin) [3a314], 110mg calcium D-pantothenate [3a841], 25.5mg biotin [3a880], 3mg vitamin C [3a300], 0.1mg vitamin B2 [3a825ii], 0.02mg vitamin K3 [3a711]

COPPER BLOCK

Mineral feed for Cattle

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

Available in:

5kg

10kg

MADE IN EU

Mineral lick with high copper content

Copper is an essential trace element for cattle and cows. It is involved in numerous biological processes, including energy metabolism, blood formation, the immune system, and fertility. With its balanced high calcium and phosphorus content, vitamins A, D3, and E, as well as selected minerals and trace elements, COPPERBLOCK serves as a targeted supplement for cattle in various life stages. In addition, COPPERBLOCK can support the rearing of young animals and contribute to balanced development.

Benefits:

- Contributes to balanced growth and overall well-being
- Can promote productivity
- Supports the function of joints, tendons, and connective tissue
- Serves to support natural immune function
- Can have a positive effect on skin and hair quality

Analytical ingredients:

37,5% sodium (Na), 0,79% calcium (Ca),
0,25% magnesium (Mg), 0,25% phosphorus (P)

Composition:

sodium chloride, calcium carbonate, dicalcium phosphate, magnesium oxide

Additives/kg:

2.000mg Copper (Cu) (Sulfate (II) pentahydrate) (3b405),
930mg Iron (Fe) (Sulphate monohydrate (II)) (3b103),
273mg Manganese (Mn) (Oxide) (3b502), 145mg Zinc (Zn) (Oxide) (3b603), 60mg Iodine (I) (Coated granulated calcium iodate anhydrous (3b203), 25mg Cobalt (Co) (Coated granulated cobalt (II) carbonate (3b304), 7,5mg Selenium (Se) (Coated granulated sodium selenite) (3b802), 15.000 IU Vitamin A (Retinyl acetate) (3a672a), 2.500 IU Vitamin D3 (Cholecalciferol) (3a671), 21,3 mg Vitamin E (All-rac-alpha-tocopherylacetate) (3a700)

SuperMAG

Mineral feed for cattle, sheep and goats

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

Mineral lick with magnesium, calcium and phosphor

Magnesium is one of the most important minerals and is stored not only in the muscles, but together with calcium and phosphorus also in the bones (about 12% magnesium content) and teeth. Magnesium is considered as a key element for muscle formation, muscle metabolism and thus for loose and well working muscles.

The mineral lick SuperMAG with its special combination of magnesium, calcium, phosphorus and other minerals is an ideal source for compensating an increased magnesium requirement. This is especially important for young animals, in stressful situations, weather-sensitive animals and older animals.

A good magnesium supply is often not guaranteed by basic feed. The SuperMAG lick is perfect for ensuring a sufficient supply of magnesium, especially during grazing periods. The high share of magnesium in SuperMAG can have a positive effect on the birth of healthy calves, lambs and foals.

SuperMAG can be used in organic production in accordance with Regulations (EU) No 2018/848 and (EU) No 2021/1165.

**MADE
IN EU**

Available in:

3kg

5kg

10kg

Benefits:

- Relaxed and healthy muscles
- Vital and relaxed animals
- Avoids colic based on tense muscles
- Healthier new-borns
- Increased fertility
- Higher quality of colostrum
- Improved immune system, e.g. against grass staggers
- Compensates the deficit of magnesium especially during pasture periods

Analytical ingredients:

30% sodium, 4.6% calcium, 2.36% magnesium, 1.05% phosphorus

Composition:

Sodium chloride, magnesium oxide, calcium carbonate, dicalcium phosphate

Nutritional additives/kg:

6,000mg zinc [zinc oxide, 3b603], 1,000mg manganese [manganese(II) oxide, 3b502], 70mg iodine [granulated calcium iodate anhydrous, 3b203], 280mg cobalt [granulated cobalt(II) carbonate, 3b304], 25mg selenium [granulated sodium selenite, 3b802]

imima

www.imima.de/en

BIOTIN+ PLUS

Mineral feed for cattle, sheep and goats

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

Mineral lick with biotin and vitamin E

The BIOTIN+ PLUS mineral lick provides a high-quality supplement to the daily feed ration. Combining pure Mediterranean salt containing natural iodine, essential trace elements, vitamin E, and biotin, it ideally supports a nutrient supply tailored to requirements.

Biotin to promote horn structure

Biotin has a very positive effect on the formation of keratin cells. Targeted supplementation can promote the natural development of the horn structure, helping to significantly increase the resilience of hooves and claws. Through the nutritional support of the hoof horn, animals become more resistant to external influences such as infections, rot, or abscesses.

Support for udder health and milk quality

BIOTIN+ PLUS is a proven choice, especially in dairy farming. The nutrients contained can help reduce the somatic cell count in milk. By strengthening the udder's natural resistance, the mineral lick makes an important contribution to maintaining high milk quality and can help minimize the risk of mastitis (udder inflammation).

**MADE
IN EU**

Available in:

3kg

5kg

10kg

Benefits:

- Promotes the natural growth and strength of horn and hooves
- Contributes to resistance against rot and abscesses
- Helps lower the somatic cell count in milk
- Can reduce the risk of mastitis (udder inflammation)
- Strengthens the immune system and can have a positive effect on cellular metabolism

Analytical ingredients:

38% sodium, 0.05% calcium, 0.04% magnesium

Composition:

sodium chloride, calcium carbonate, magnesium oxide

Nutritional additives/kg:

650mg zinc [zinc oxide, 3b603], 80mg iodine [granulated calcium iodate coated anhydrous, 3b203], 85mg cobalt [granulated cobalt(II) carbonate coated, 3b304], 20mg selenium [granulated sodium selenite coated, 3b802], 1000mg vitamin E [3a700], 50mg biotin [vitamin H, 3a880]

ZINCOBLOCK

Mineral feed for horses, cattle, sheep and goats

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

**MADE
IN EU**

Available in:

3kg

5kg

10kg

Mineral lick, rich in zinc, with iron, cobalt and selenium

The special combination of zinc, cobalt and selenium makes ZINCOBLOCK ideal for preventing metabolic disorders, skin and coat problems, brittle hoof horn, muscular diseases and fertility problems. ZINCOBLOCK is therefore excellent for promoting healthy skin and growth of healthy hooves and high-quality wool. Due to the positive influence of ZINCOBLOCK on the B12 production the metabolism in the rumen can also be supported.

ZINCOBLOCK can be used in organic production in accordance with Regulations (EU) No 2018/848 and (EU) No 2021/1165.

Benefits:

- Healthy growth of hoof, horn and coat
- Increased fertility
- Stronger immune system, e.g. against fungal disease
- Better health and growth
- Improvement of feed intake thus higher growth and thrive
- Supports the natural detoxification process of the animals

Analytical ingredients:

38% sodium, 0.30% calcium

Composition:

Sodium chloride, calcium carbonate

Nutritional additives/kg:

9,000mg zinc [zinc oxide, 3b603], 1,400mg iron [iron(II) sulphate monohydrate, 3b103], 400mg cobalt [cobalt(II) carbonate granulated, 3b304], 20mg selenium [sodium selenite granulated, 3b802]

VITAMIN PLUS *Selen*

Mineral feed for horses, cattle, sheep, goats and deer

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

**MADE
IN EU**

Available in:

3kg

5kg

10kg

Mineral lick made of Mediterranean salt, rich in vitamins plus selenium

The high-quality formula of this lick with selenium in combination with vitamins A, D3 and E has a very positive effect on the immune system and metabolic processes of animals.

Sufficient supply of vitamins and selenium can protect the cells of the animal from harmful influences and support the production of antibodies. Since most soils today are very low in selenium, the selenium content in the basic feed, such as hay and grass, is consequently also too low or deficient. The lick Vitamin Plus Selenium can prevent a deficiency and the health and vitality of the animal can be maintained or increased.

The contained selenium, in inorganic and organic form, has a very high bioavailability to efficiently counteract a selenium deficiency.

Effect + benefits:

- Can protect the cells of the animal from harmful influences
- Can support the production of anti-bodies
- Counteracts selenium deficiency in animals
- Supports a healthy, balanced diet
- For more vitality and productivity

Analytical ingredients:

37.5% sodium, 0.79% calcium, 0.35% magnesium, 0.25% phosphorus

Composition:

Sodium chloride, calcium carbonate, dicalcium phosphate, magnesium oxide

Nutritional additives/kg:

930mg iron [iron(II) sulphate monohydrate, 3b103], 273mg manganese [manganese(II) oxide, 3b502], 145mg zinc [zinc oxide, 3b603], 60mg iodine [granulated calcium iodate anhydrous, 3b203], 25mg cobalt [granulated cobalt(II) carbonate, 3b304], 25mg selenium [granulated sodium selenite, 3b802], 10mg selenium [selenomethionine (inactivated selenium yeast), 3b8.12], 22,500 IU Vitamin A [3a672a], 3,750 IU Vitamin D3 [3a671], 32mg Vitamin E [3a700]

Available in green and white.

Mineral lick with natural essential oils from mint and eucalyptus

MultiVitamin BRONCHIAL mineral lick contains minerals, trace elements and vitamins. It is enhanced with natural essential oils from mint and eucalyptus to alleviate and ease respiratory symptoms.

Especially during cold and wet weather many animals suffer from respiratory symptoms and a weakened immune system. The special formula of the lick in combination with its natural essential oils from mint and eucalyptus helps to loosen mucus and has a soothing effect on the inflammatory processes of the respiratory tracts.

The rich combination of minerals, trace elements and vitamins strengthen the immune system.

Therefore, the MultiVitamin BRONCHIAL mineral lick is suited to support the respiratory system and the well-being of animals in a natural way.

The lick block is based on food-grade Mediterranean Sea salt with natural iodine.

Benefits:

- Relief to the respiratory passages
- Helps to loosen mucus
- Strengthening of the immune system
- Supports health and improves physical vitality
- Suited for permanent feeding

Analytical ingredients:

36.9% sodium, 1.03% calcium, 0.35% magnesium, 0.27% phosphorus

Composition:

Sodium chloride, calcium carbonate, magnesium oxide, dicalcium phosphate

Nutritional additives/kg:

930mg iron [iron(II) sulphate monohydrate, 3b103], 273mg manganese [manganese(II) oxide, 3b502], 145mg zinc [zinc oxide, 3b603], 60mg iodine [granulated calcium iodate anhydrous, 3b203], 25mg cobalt [granulated cobalt(II) carbonate, 3b304], 7.5mg selenium [granulated sodium selenite, 3b802], 15,000 IU Vitamin A [3a672a], 2,500 IU Vitamin D3 [3a671], 21.3mg Vitamin E [3a700]

Sensory additives:

Essential oils of mint and eucalyptus

ENERGOBLOCK

Mineral feed for cattle, sheep and goats

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

**MADE
IN EU**

Available in:

3kg

5kg

10kg

Available in red and white.

Mineral lick with special power formula

With its special combination of dextrose, vegetable fat, milk powder, minerals and vitamins the mineral lick ENERGOBLOCK is supplying a high-level of energy and is suited to compensate the daily loss of energy of grazing animals. Young, pregnant, diseased or weak animals can be strengthened.

ENERGOBLOCK improves the milk quality and increases the milk productivity. It improves fertility and serves as high-quality source of energy.

Benefits:

- Provides high-level of energy
- Supports weight increase
- Regains energy level of grazing animals
- Strengthens young, pregnant, diseased or weak animals
- Improves fertility
- Richer milk
- Stronger and heavier young animals
- Healthier animals

Analytical ingredients:

29.4% sodium, 6.87% calcium, 0.54% phosphorus, 0.32% magnesium

Composition:

Sodium chloride, calcium carbonate, dicalcium phosphate, dextrose, fat (vegetable), milk powder

Nutritional additives/kg:

930mg iron [iron(II) sulphate monohydrate, 3b103], 273mg manganese [manganese(II) oxide, 3b502], 145mg zinc [zinc oxide, 3b603], 60mg iodine [calcium iodate granulated (coated, anhydrous), 3b203], 25mg cobalt [cobalt(II) carbonate granulated (coated), 3b304], 7.5mg selenium [sodium selenite granulated (coated), 3b802], 15,000 IU Vitamin A [3a672a], 2,500 IU Vitamin D3 [3a671], 21.3mg Vitamin E [3a700]

MOLASSES Plus

Mineral feed for cattle, sheep and goats

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

Available in:

5kg

10kg

**MADE
IN EU**

Mineral lick for targeted energy supplementation

Especially during the grazing season or periods of high physical demand, the energy requirements of livestock increase noticeably. The MOLASSES PLUS lick offers a palatable way to close this gap in a targeted manner. Due to its high molasses content, the mineral lick serves as a highly digestible, quick source of energy. High palatability ensures excellent acceptance, making it an ideal supplement on the pasture as well as in the barn.

Benefits:

- Ideal for grazing lambs, goats, and cattle to meet increased energy requirements
- Offers valuable support for young animals, pregnant animals, and during phases of increased demand
- Supports the overall well-being and vitality of the animals
- Can positively accompany milk yield and feed intake
- Due to high acceptance, also excellently suited for feeding deer/wildlife

Analytical ingredients:

36.2% sodium, 0.79% calcium, 0.35% magnesium, 0.25% phosphorus

Composition:

sodium chloride, calcium carbonate, dicalcium phosphate, magnesium oxide, molasses (5%)

Nutritional additives/kg:

930mg iron [iron(II) sulfate monohydrate, 3b103], 273mg manganese [manganese(II) oxide, 3b502], 145mg zinc [zinc oxide, 3b603], 60mg iodine [calcium iodate granulated (coated, anhydrous), 3b203], 25mg cobalt [cobalt(II) carbonate granulated (coated), 3b304], 7.5mg selenium [sodium selenite granulated (coated), 3b802], 15000 IU vitamin A [3a672a], 2500 IU vitamin D3 [3a671], 21.3mg vitamin E [3a700]

CALCIBLOCK

Mineral feed for cattle, sheep and goats

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

Available in:

5kg

10kg

**MADE
IN EU**

Mineral lick rich in calcium, with vitamins and phosphorus

With its balanced combination of calcium, vitamins A, D3, and E, as well as selected minerals and trace elements, CALCIBLOCK can be a targeted supplement for pregnant and lactating animals to cover their physiologically increased calcium requirement. In addition, CALCIBLOCK offers valuable support during the rearing of young animals and contributes to normal bone and skeletal development.

Benefits:

- Supports bone and tissue development
- Can promote the vitality of young animals
- Can be used as a support during the gestation phase
- Can help support milk yield

Analytical ingredients:

28.4% sodium, 10% calcium, 0.35% magnesium, 0.25% phosphorus

Composition:

sodium chloride, calcium carbonate, dicalcium phosphate, magnesium oxide

Nutritional additives/kg:

930mg iron [iron(II) sulfate monohydrate, 3b103], 273mg manganese [manganese(II) oxide, 3b502], 145mg zinc [zinc oxide, 3b603], 60mg iodine [calcium iodate granulated (coated, anhydrous), 3b203], 25mg cobalt [cobalt(II) carbonate granulated (coated), 3b304], 7.5mg selenium [sodium selenite granulated (coated), 3b802], 15000 IU vitamin A [3a672a], 2500 IU vitamin D3 [3a671], 21.3mg vitamin E [3a700]

VITBLOCK

Mineral feed for horses, cattle, sheep and goats

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

Available in:

5kg

10kg

MADE IN EU

Mineral lick rich in vitamins, with phosphorus, magnesium, and calcium

VITBLOCK combines the essential vitamins A, D3, and E with minerals and trace elements. It offers a targeted feed supplement to support the body's natural defenses and can promote the animals' general well-being. In this way, it can contribute to maintaining natural fertility, vitality, and balanced growth. The basis for VITBLOCK is our high-quality, food-grade Mediterranean salt with natural iodine.

Benefits:

- Can contribute to supporting normal fertility
- Serves to strengthen natural immune function
- Contributes to maintaining physiological productivity
- Favors balanced growth and general well-being
- Can have a positive effect on skin condition and bone maintenance

Analytical ingredients:

37.5% sodium, 0.79% calcium, 0.35% magnesium, 0.25% phosphorus

Composition:

sodium chloride, calcium carbonate, dicalcium phosphate, magnesium oxide

Nutritional additives/kg:

PREMIUMBLOCK

Mineral feed for cattle, horses, sheep, goats and deer

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

Mineral lick with trace elements and Mediterranean Sea salt

Salt and trace elements are the essential parts of daily nutrition and ensure good performance and productivity. PREMIUMBLOCK ideally supplements the daily food with salt and trace elements. Thus, it can contribute to the prevention of deficiency diseases as well as a balanced metabolism and good health in general.

The basic ingredients of the PREMIUMBLOCK are high-quality Mediterranean Sea salt with natural iodine, which has been enriched with trace elements.

The sea salt for our lick blocks is exclusively extracted within the EU and is subject to strict quality control. The production follows the high European environmental and social standards.

PREMIUMBLOCK can be used in organic production in accordance with Regulations (EU) No 2018/848 and (EU) No 2021/1165.

MEDITERRANEO

Mineral feed for cattle, horses, sheep and goats

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

Salt lick with natural Mediterranean Sea salt

Salt is the most important mineral for cattle, horses, sheep and goats. The natural salt content of grass and hay does not satisfy the needs of animals.

The MEDITERRANEO salt lick provides high-quality, natural sea salt in food grade quality to the animals.

Salt is instrumentally important for the nervous and muscular systems of animals. Firstly, salt regulates the water absorption of the tissues and thus the fluid balance in the body and prevents dehydration, which in turn reduces the risk of colic. Secondly, salt is also needed for glucose transport between cell membranes. A deficit would lead to fatigue, muscle weakness and loss of performance.

Animals have a natural ability to sense their salt needs and with the help of the MEDITERRANEO lick, they can supply themselves according to their individual needs.

The sea salt for our lick blocks is exclusively extracted within the EU and is subject to strict quality control. The production follows the high European environmental and social standards.

MEDITERRANEO can be used in organic production in accordance with Regulations (EU) No 2018/848 and (EU) No 2021/1165.

ANTI-STRESS PLUS

Mineral feed for pigs

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

Available in:

5kg

10kg

**MADE
IN EU**

Anti-Stress and calming licking block

With our specially selected calming and soothing herbal mixture, this mineral lick acts as a natural low impact tranquilizer that calms your livestock's nervous system. It significantly reduces restlessness and ensures that your animals enjoy recovery phases and serenity. It promotes deep relaxation and minimizes animal restlessness. It also supports a healthier birth and reduces stress during pregnancy, resulting in more robust and resilient animals.

Effect + Benefits:

- Supports the general well-being of the animals
- Acts as boredom breaker and supports the instinct to play
- Calms the nervous system
- Can reduce the cannibalism effect
- Healthier births
- Stronger immune system
- Can support more calmness in the herd

Analytical ingredients:

32.5% sodium, 1.55% calcium, 3.75% magnesium, 0.27% phosphorus

Composition:

sodium chloride, calcium carbonate, dicalcium phosphate, magnesium oxide, molasses, calming herbal mixture

Nutritional additives/kg:

106,160mg zinc [zinc oxide, 3b603], 17,775mg manganese [manganese(II) oxide, 3b502], 12,445mg iodine [granulated calcium iodate anhydrous, 3b203], 4,975mg cobalt [granulated cobalt(II) carbonate, 3b304], 444mg selenium [granulated sodium selenite, 3b802]

EUROLIX Dairy

Mineral feed for cattle and cows

ANIMALIXS[®]
— LICKS FOR VITAL ANIMALS —

Available in:

24kg

80kg

The **EUROLIX Dairy** mineral bucket is formulated to provide dairy cows with all the necessary minerals and vitamins they need for healthy growth and high productivity.

The mineral lick EUROLIX Dairy can help the animals to cover their needs of minerals in the best possible way, while molasses supplies them with energy for milk production.

Providing a mineral bucket can prevent behavioral problems in animals that occur due to a mineral deficiency, such as eating dirt or licking walls.

With a licking bucket cattle and cows can use the product according to their own needs to get the necessary minerals and vitamins in the required amount.

Analytical ingredients:

18% calcium, 3.5% phosphorus, 8.3% sodium, 4% magnesium, 45% crude ash, 8% crude protein

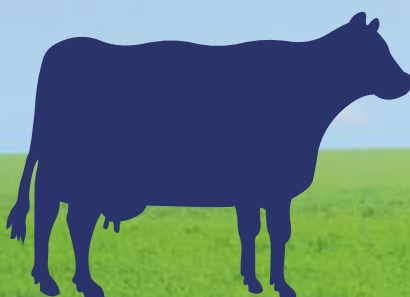

Composition:

molasses, calcium carbonate, dicalcium phosphate, sodium chloride, magnesium oxide, sodium bentonite, calcite

Nutritional additives/kg:

3,000mg zinc [zinc oxide, 3b603], 2,000mg manganese [manganese(II) oxide, 3b502], 1,000mg copper [copper(II) sulfate pentahydrate, 3b405], 120mg iodine [calcium iodate anhydrous, 3b202], 20mg selenium [sodium selenite, 3b801], 15mg cobalt [cobalt(II) sulfate heptahydrate, 3b305], 15mg biotin [3a880], 160,000 IU Vitamin A [3a672a], 35,000 IU Vitamin D3 [3a671], 1,000mg Vitamin E [3a700]

EUROLIX High Yield

Mineral feed for cattle and cows

ANIMALIXS[®]
— LICKS FOR VITAL ANIMALS —

Available in:

24kg

80kg

With its extremely nutrient-rich composition the mineral lick **EUROLIX High Yield** serves to provide cows, which are especially high performing, with all the necessary minerals and vitamins they need for healthy growth and high productivity. Molasses provides them with the necessary energy, for example, for milk production.

The formula contains inorganic and organic minerals to ensure particularly high bioavailability and to meet the mineral requirements in the best possible way.

Providing a mineral bucket can prevent behavioral problems in animals that occur due to a mineral deficiency, such as eating dirt or licking walls.

The lick can have a positive effect on increasing the performance of dairy cows and supports the health of hoof, horn and coat.

As a free choice supplementary feed, the mentioned animals lick this product to get the necessary minerals and vitamins in the required amount.

Analytical ingredients:

18% calcium, 3.5% phosphorus, 8.1% sodium, 4% magnesium, 45% crude ash, 8% crude protein

Composition:

molasses, calcium carbonate, dicalcium phosphate, sodium chloride, magnesium oxide, sodium bentonite, calcite

Nutritional additives/kg:

5,000mg zinc [zinc oxide, 3b603], 130mg zinc [zinc chelate, 3b606], 3,000mg manganese [manganese(II) oxide, 3b502], 1,200mg copper [copper(II) sulfate pentahydrate, 3b405], 20mg copper [copper chelate, 3b406], 200mg iodine [calcium iodate anhydrous, 3b202], 40mg selenium [sodium selenite, 3b801], 2mg selenium [organic selenium, 3b8.10], 35mg cobalt [cobalt(II) sulfate heptahydrate, 3b305], 30mg biotin [3a880], 320,000 IU Vitamin A [3a672a], 70,000 IU Vitamin D3 [3a671], 1,000mg Vitamin E [3a700], 1,000mg Vitamin B3 [niacin, 3a314]

EUROLIX Respiratory

Mineral feed for cattle and cows

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

Available in:

24kg

80kg

The licking bucket **EUROLIX Respiratory** not only serves to provide cattle with all necessary minerals and vitamins, but also has a positive effect on the respiratory system, thanks to the contained essential oils of mint and eucalyptus.

The lick can strengthen the animals' immune system and supports the respiratory functions.

With EUROLIX Respiratory cattle and cows can lick the product according to their own needs to absorb the needed minerals and vitamins in the required amount. Providing a licking bucket can prevent behavioral disorders of animals that occur due to a mineral deficiency, such as eating dirt or licking walls.

Effect + benefits:

- Relief of respiratory system
- Essential oils have a beneficial effect on the respiratory tract
- Strengthens the immune system
- Serves as an additional source of energy
- Supports the maintenance of a neutral pH value of the stomach

Analytical ingredients:

16.5% calcium, 2.0% phosphorus, 8.3% sodium, 3% magnesium, 45% crude ash, 8% crude protein

Composition:

molasses, calcium carbonate, dicalcium phosphate, sodium chloride, magnesium oxide, sodium bentonite, calcite

Nutritional additives/kg:

1,500mg zinc [zinc oxide, 3b603], 1,000mg manganese [manganese(II) oxide, 3b502], 1,000mg copper [copper(II) sulfate pentahydrate, 3b405], 10mg iodine [calcium iodate anhydrous, 3b202], 10mg selenium [sodium selenite, 3b801], 30,000 IU Vitamin A [3a672a], 5,000 IU Vitamin D3 [3a671], 3,000mg Vitamin E [3a700], 3,000mg Vitamin C [3a300], 150mg Vitamin B1 [3a821]

PREMIUMLIX Supreme

Mineral feed for sheep and goats

ANIMALIXS[®]
— LICKS FOR VITAL ANIMALS —

Available in:

12kg

24kg

Thanks to its unique and high-quality composition, the licking bucket **PREMIUMLIX Supreme** provides sheep and goats with all the necessary minerals and vitamins they need for healthy growth and high productivity. The contained molasses serves as an additional energy supplier for milk production.

This premium lick has been specially developed for sheep and goats, taking into account their needs for minerals and trace elements. With the licking bucket **PREMIUMLIX Supreme** an increase in performance, weight and growth can be achieved and the possibility of foot, hoof and skin problems can be prevented.

As a free choice supplement, sheep and goats can lick this product to get the needed minerals and vitamins in the required amount. Providing mineral licks can help to prevent behavioral disorders such as eating dirt or licking walls which occur due to a mineral deficiency.

Effect + benefits:

- Helps to increase milk production and milk quality
- Supports the improvement of fertility and health
- Can lead to weight gain
- Healthy horn and coat
- Supports a healthy digestion
- Improvement of wool quality in sheep

Analytical ingredients:

16.3% calcium, 1.5% phosphorus, 8% sodium, 5% magnesium, 45% crude ash, 8% crude protein

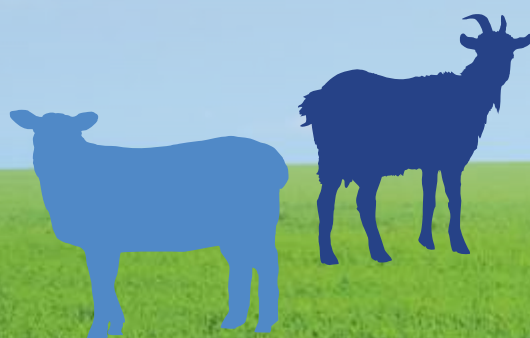

Composition:

molasses, calcium carbonate, dicalcium phosphate, sodium chloride, magnesium oxide, sodium bentonite, calcite

Nutritional additives/kg:

5,000mg zinc [zinc oxide, 3b603], 250mg zinc [zinc chelate, 3b606], 2,500mg manganese [manganese(II) oxide, 3b502], 100mg iodine [calcium iodate anhydrous, 3b202], 80mg cobalt [cobalt(II) sulfate heptahydrate, 3b305], 120mg selenium [sodium selenite, 3b801], 160,000 IU Vitamin A [3a672a], 32,000 IU Vitamin D3 [3a671], 1,000mg Vitamin E [3a700], 200mg Vitamin B3 [niacin, 3a314]

ENERGY ROLL

Gnawing block for rabbits, hares and guinea pigs

ANIMALIXS®
— LICKS FOR VITAL ANIMALS —

**MADE
IN EU**

Available in:

250g

Gnawing stone for hares and rabbits

Our lick and gnawing stone contains a special energy and health mix for hares and rabbits. It consists of dextrose, vegetable fats, milk powder, essential minerals, trace elements, and vitamins.

ENERGY ROLL contains thyme and oregano; its core ingredient is high-quality salt from the Mediterranean Sea, which tastes especially good and is beneficial for the animals. **ENERGY ROLL** was specially developed for the gnawing needs of hares and rabbits. Thanks to its very hard consistency, animals can gnaw on the stone to their heart's content, sharpening their teeth while simultaneously absorbing vitamins, trace elements, and minerals. Gnawing on the **ENERGY ROLL** keeps the animals busy, thereby helping to prevent cannibalism.

ENERGY ROLL has a diameter of 10 cm. With the hole in the center, the gnawing stone can easily be placed in the enclosure

Benefits:

- Healthy, lively, and resilient animals
- Weight gain
- Prevention of cannibalism
- Increased fertility

Analytical ingredients:

34.8% sodium, 1.45% calcium, 1.50% magnesium, 0.50% phosphorus

Composition:

sodium chloride, calcium carbonate, magnesium oxide, dicalcium phosphate, dextrose, milk powder, vegetable fat, molasses, carob flour, oregano, thyme

Nutritional additives/kg:

25mg manganese [manganese(II) oxide, 3b502], 20mg zinc [zinc oxide, 3b603], 15mg iron [iron(II) sulfate monohydrate, 3b103], 10mg selenium [granulated sodium selenite coated, 3b802], 4mg copper [copper(II) sulfate pentahydrate, 3b405], 0.3mg iodine [granulated calcium iodate anhydrous coated, 3b203], 0.05mg cobalt [granulated cobalt(II) carbonate coated, 3b304], 2,400 IU Vitamin A [3a672a], 240 IU Vitamin D3 [3a671], 12mg Vitamin E [3a700], 12mg Vitamin B3 [niacin, 3a314], 2.8mg Calcium D-pantothenate [3a841], 1.2mg Vitamin B2, 0.6mg Vitamin B6 [3a831], 0.4mg Vitamin K3 [3a711], 0.4mg Vitamin B1 [3a821], 0.1mg folic acid [3a316], 0.004mg Vitamin B12

ABOUT US AND OUR PRODUCTS

Imima is the exclusive distribution partner of the manufacturer S.I.N. HELLAS. Together, we offer the most comprehensive selection of mineral licks and demonstrate that animals can absorb far more beneficial nutrients through lick blocks beyond just salt and minerals. For over 25 years, S.I.N. HELLAS has been producing a wide variety of mineral licks from pure Mediterranean salt in food-grade quality and is today considered a market leader for specialized and innovative salt licks. Specialized mineral licks have been developed through which cattle, cows, sheep, goats, deer, and horses can easily absorb minerals, trace elements, vitamins, herbs, essential oils, and even live yeast according to their individual needs.

Brand new is the first specialized mineral lick developed for pigs, which promotes composure and well-being in the animals thanks to its formulation with soothing plant extracts. With the help of our mineral licks, nutritional deficiencies and resulting illnesses can be prevented. The animals remain vital & healthy and are more resilient against diseases.

Decades of experience go into every single one of our mineral licks. Production is certified according to both ISO 22000 and QS standards. The lick blocks are developed in the EU and manufactured in Greece in accordance with EU social and environmental standards. Along with a good feeling, this brings the laughter of the Greek sun to us and our animals.
